Majestic Polyanthus

Primroses

Because of more concentrated efforts on hybridizing, perfecting of present colors and form, and development of new colors and improved qualities, it is impossible to continue the sale of plants.

SEEDS

For the primrose zealot seeds are readily available for those near and afar off, and produce liberal results. The Majestic seeds have produced blue-ribbon and trophy plants at the International Primrose Shows, are produced from clean sturdy plants of fine form, and from blooms that have been strictly hand pollinated. They have a reputation for high percentage of germination, sturdy plants, and rare colors.

The seed is fully ripened, well cured, and kept in the refrigerator, but is not treated chemically. Do not experiment with choice seed. Use tried and reliable methods of growing. A few extra days of patience spells greater safety. Watch for aphids and damping off.

1951 - 1952

COLORS

Standard Colors

Flame—A bed of these carries the torch for Helio sand Aurora—vivid salmon, apricot, orange, rosy peach, henna, bronze.

Yellow—Deep saffron, golden, lemon, and cream.

White—Snowy, pearly, white blooms, light and dark centers.

Blues—Shading from light to medium, to “darkly, deeply, beautifully blue.” Improved in size, length of stem, color, and form.

Reds—Glowing cardinals, crimson, carnation, flamingo, maroon, and damask.

Lavender—Undergoing improvement for clarity, fine light Easter orchid, blending into carmine.

Purple—Royal, blending into plum and violet.

Pastel—Soft shades of all colors from plants especially selected, grouped, and crossed, in tones clear, suffused, spotted, under-lined including some seeds of a new lavender-pink or wild rose.

New Introductions

By L. A. Eickman

Majestic Crown Pink and Coral

The result of many years of selection and hand crossing. A true, clear pink, both light and dark, texture of the Henry Morse rose, and the abalone shell, some a true coral. Because of overlapping of these colors, the pink and coral seeds are blended.

Majestic "Warm Laughter"

Result of many years breeding. A strain of clear colors in rosy-salmon, coral-flame, some tangerine. A bed of these radiant blooms brightens the spot as the bright sun. But the joy is in the color and texture of the individual bloom

Prices of Seeds

Standard Colors

Flame, yellow, white, blues, reds, lavender, carmine-purple, pastels, in separate colors, or a mixed packet of all the above, 200-300 seeds, postpaid per packet....\$1.00
